

ETHAN ALFONSO GINORI RODRIGUEZ

FULL STACK DEVELOPER · REACT / TYPESCRIPT / SPRING BOOT

ethan.ginori@gmail.com | Morelia, Mexico (Open to Remote)
linkedin.com/in/ethan-ginori | github.com/ChapaRacer

PROFESSIONAL SUMMARY

Computer Systems Engineer (9.3/10 GPA) with hands-on experience building Full Stack applications end to end: interfaces with React and TypeScript, REST APIs in Spring Boot, and relational databases. Delivered 3 complete projects in production, including a financial dashboard for capital tracking and a gamification tool for cybersecurity training. Seeking a junior position to contribute clean code, learn from senior engineers, and grow into software architecture.

AREAS OF EXPERTISE

- React + TypeScript
- UI Development
- Relational Databases (SQL)
- Python Scripting
- Agile Methodologies / Jira
- Spring Boot
- REST API Integration
- Authentication / Web Security
- Docker

PROFESSIONAL EXPERIENCE

Full Stack Developer (Intern) · Zittheonsoft

Jan 2026 – May 2026

- Built an interactive financial dashboard (React + TypeScript) for capital tracking and annual reporting, used by the finance team. Repo: github.com/ChapaRacer/Proyecto_Zittheonsoft_v2.2
- Designed the backend architecture with Spring Boot and REST APIs, supporting dynamic report loading from multiple relational data sources.
- Managed the relational database and configured testing environments, validating data integrity before each deployment.

Software Developer — Social Service · IIES-UNAM Campus Morelia

Dec 2024 – Jun 2025

- Built, as part of a multidisciplinary team, a gamification tool to train students in cybersecurity fundamentals.
- Implemented backend and frontend modules of the platform, collaborating across design, testing, and deployment.

Web Developer (Frontend & Backend) · Project "Los Revolucionarios"

Feb 2024 – Jun 2024

- Implemented Full Stack functionality as part of a team; project won 1st place in a school-wide web development competition.
- Participated in design, QA testing, and production deployment of the winning application.

PERSONAL PROJECTS (GITHUB: [GITHUB.COM/CHAPARACER](https://github.com/CHAPARACER))

- gameverse — JavaScript application.
- distributed-inventory-system — distributed inventory system.

KEY ACHIEVEMENTS

- Data automation: built Python scripts (BeautifulSoup) for automated metadata extraction and management from web platforms.
- Academic performance: 3.72 GPA in Computer Systems Engineering, specialization in Software Development.

EDUCATION

B.S. in Computer Systems Engineering · Instituto Tecnológico de Morelia

Specialization in Software Development · GPA: 3.72 · Aug 2021 – Jun 2026

ADDITIONAL INFORMATION

- Languages: Spanish (Native), English (C2) · Programming: Java, C#, Python, SQL, TypeScript
- Frameworks / Tools: React, Spring Boot, Git, Docker, pgAdmin, Figma, Power BI, Jira
